

# Career Development and Life Design

## 2023 Spring Calendar of Events

### MONTHLY WORKSHOPS

<p><i>Exploring Careers</i></p> <p>Exploring careers is an active process of inquiry, social relationships, experience, and reflection. In this workshop, participants will focus on challenges that resonate with them, informational interviewing, core career competencies, the role of internships, and reflecting as means of exploring career pathways.</p>	<p><i>Resume Workshop</i></p> <p>We often consider a resume to be a vital document that helps us to get job offers. In this interactive workshop, we unpack and practice the reflective and analytical tasks involved in developing a resume.</p>	<p><i>Compelling Cover Letters</i></p> <p>Cover letters needn't perplex you. They are a fairly straightforward genre for which you can learn the rules. By the end of this workshop, you will be able to describe the needed parts of this genre and apply them to a cover letter example of your own.</p>
<p><i>Interview Workshop</i></p> <p>Interviewing can be a relational and rewarding experience. This workshop will provide opportunities for participants to generate and practice responses to behavioral interview prompts. We'll also delve into other types of interactions that commonly occur during interviews.</p>	<p><i>Job Search Tools</i></p> <p>Are you wondering where to begin with your job search? Learn the steps for this process and discover tools for connecting to opportunities after Hollins.</p>	<p><i>Networking</i></p> <p>Launching your career is a social process, not a series of dozens or hundreds of online job applications. Join us as you and your peers learn steps building a network that matters and language to use in the process.</p>
